

(a) Impact of  $\lambda_d^X$  and  $\lambda_d^Y$  on Cloth

(b) Impact of  $\lambda_d^X$  and  $\lambda_d^Y$  on Sport

Figure: When  $\lambda_a$  and  $\lambda_c$  are fixed, we evaluate the impact of varying  $\lambda_d^X$  and  $\lambda_d^Y$  within the range  $[0.1, 1.0]$  on model performance using the Cloth-Sport dataset.
